

SCHOOL VISITS 2019-2020

The Facility

Welcome to Resurgo Place! Come explore and discover some of the highlights of our collection, and experience our amazing hands-on Transportation Discovery Centre. Resurgo Place has a lot to offer and we will work with you to meet your program outcomes. Below, you will find more information on what we have to offer

Guided Visits

In the guided portion of your visit, interpreters will introduce you to our Interactive Floor Map, Heritage Collection and Transportation Discovery Centre. They will also be happy to show the current Temporary Exhibit on display. Following the tour, please feel free to explore Resurgo Place until it's time to go. The adjacent Free Meeting House, a National Historic Site and one of the city's oldest standing buildings (1821) is also available for visits.

Temporary Exhibits

Resurgo Place annually hosts three to four temporary exhibits that travel from different museums across the country. These high-quality exhibits all have accompanying education material and offer various subjects and themes to explore. Here are the upcoming exhibits for 2019-2020:

HOCKEY

September 21, 2019 - January 12, 2020

A traveling exhibition developed by the Canadian Museum of History

The sweat-soaked smell of the dressing room. The flick of the wrist-shot. The roar of the fans. For millions of Canadians, winter means hockey and hockey means everything. Be there when the puck drops on Hockey. Trace the sport's evolution through historic highlight reels, interactive components and one-of-a-kind artifacts. Explore the places where Canadians live and breathe hockey: from dressing room to press-box, rink to corporate boardroom, players' bench to the backyard game. Find out why hockey holds pride of place in the hearts of Canadians.

SOUND, JUST SOUND!

January 25, 2020 - April 5, 2020

A traveling exhibition developed by the Sherbrooke Museum of Nature and Science

Any impact creates vibrations in the air that translates into sounds. The impact of the wind on leaves, the air flowing from our lungs on our vocal cords, a door closing, the shuffle of ants moving, the electronic impulses of a bell... Sound waves are everywhere!

INSPIRING NATURE, INSPIRED TECHNO

April 11, 2020 - September 6, 2020

A traveling exhibition developed by the Sherbrooke Museum of Nature and Science

Biomimeticism invites us to reconnect with our innate need to live in harmony with nature. The word comes from “bios” meaning “life” and “mimesis” meaning “to imitate”. This discipline is based on observations of forms, processes and systems to imitate the genius of nature and offer innovative paths to solutions. When dreamers, creators and researchers observe nature and draw inspiration from it, all kinds of promising concepts, fascinating ideas and inspirational projects come to light.

Special Activities and Projects

You have an idea for a special activity or project for your class? We would love to hear it!

Free Visit for Teachers

The best way to learn more about what Resurgo Place has to offer is to see it for yourself. For this reason, each teacher is offered a one-time admission to our facility free of charge during regular hours of operation.
