

SCHOOL GROUPS (May - June)

December 2022 update
Subject to change

Program

Welcome to Resurgo Place, where Moncton heritage, technology and discovery intersect! The museum has a lot to offer and we will work with you to help meet your curriculum outcomes.

Our end-of-year School Groups Program, offered during the months of **May and June**, includes your choice of **4 stations (max)** among the options listed below! Your class will be divided into smaller groups, with every group spending 15-20 minutes at each station. Unless otherwise specified, stations can be adapted to all ages.

1. Heritage Collection

An exploration of Moncton's Heritage via simple to more complex games

From an 'I spy' game with the youngest to a more detective oriented search with the oldest, this station explores Moncton's history through our artefacts collection. This station can be adapted to a specific subject at your request.

2. Mezzanine Floor Map

a. For grades k-5: a fun game involving our giant floor map of Moncton

Recognizing that shapes, figures, and the use of different colors are all featured on maps as a form of language, this 'find it' game will encourage students to communicate through symbols.

b. For grades 6-12: a challenge based on our giant floor map involving map reading skills

Although most of us now rely on digital map searches or GPS information to find an address, it hasn't always been that way. Using the City Paper Map and the Mezzanine Floor Map, this station uses a fun challenge to introduce students to more traditional ways of navigation.

3. Temporary Exhibits

High-quality exhibits with accompanying educational material

Resurgo Place annually hosts three to four temporary exhibits that travel from different museums across the country, offering various subjects and themes to explore. Visit our website to see current and upcoming exhibits!

4. Moving Science

A safe and interactive demonstration of air movement (includes the hovercraft)

At this station, students will have the opportunity to learn about the different ways we collect and use air to move objects. Students will not only be introduced to our Vortex Cannon, Rocket Bowling and Hovercraft – they'll be given the opportunity to try them out!

5. Craft Time

For grades 1-7 (adapted to age group): a short craft period to build something with your own hands

Part art, though mostly science, our crafts are a fun way to build a keepsake and learn while doing it! Crafts include parachute cup, static electricity butterfly, paper rocket, and various paper planes. Your crafts could also be used in the Transportation Discovery Centre!

6. Backwards Brain Bike

For grades 8-12: This bike turns left when you move the handlebars to the right!

All through our lives, we develop reflexes to help keep us safe. Consequently, a lot of what we do on a bicycle becomes instinctual... but what happens when our instincts trick us? A short demonstration followed by a hands-on experience for a few keen students.

7. Transportation Discovery Centre

A highly interactive way to explore buoyancy, wind power, air pressure, and robots!

Our main attraction. Students will have access to our wind tunnel, rocket launcher, submarine challenge and remote-controlled robots to discover and learn some basics about science.

Amenities

- Barrier-free access
- Bus parking
- Centrally located
- Washrooms

Special Activities and Projects

You have an idea for a special activity or project for your class? We would love to hear it!

Free Visit for Teachers

The best way to learn more about Resurgo Place is to see it for yourself. Teachers are offered a one-time free admission.

May - June

Monday to Friday
2 hours
